

**[TECHNOLOGICAL INNOVATION AND
CONSTANCE RESEARCH AT YOUR SERVICE]**

**AUTOMATION OF THE PRODUCTION
PROCESS**

- ▶ Treesse Progetti was established in 1986 as a company providing automation software for industrial production processes.
- ▶ The company has been in business for 20 years and it has become a leader in "working process" automation engineering, and in providing high standards and great services.
- ▶ The company offers its very competitive services to several sectors but the food industry is main business in which the company operates.
- ▶ The company also develops with great results, engineering and automation processes in the chemical and pharmaceutical sectors of the food industry where controlled processes are needed.
- ▶ Treesse Progetti has gathered a high level of know-how in production processes - particularly in the food and beverages markets - through collaboration with national and international companies and by the development of new facilities.

>> OUR **STRENGTH**

- > The success of Treesse Progetti is based on continuous professional development delivered to its workforce. Highly experienced technicians and engineers - have gathered their knowledge throughout 20 years of dedication in the business - continuously search for new techniques and technologies to optimize performance, cut costs and look for more environmentally-friendly solutions.
- > Company references can be obtained from several national and international companies – both from clients and partners. The development of management skills and new systems for large multinational companies distinguishes the services offered.
- > Treesse Progetti's management possess the skills to create a highly organised and efficient organisation which is able to address its client's business issues in a systematic manner. This allows our clients to find precise answers to their technical, managerial and financial needs.
- > In summary, treesse progetti is an organisation helping its clients deliver their organisational strategies.

>> **ORGANIZATIONAL** STRUCTURE

The company considered two key aspects when establishing its internal structure - the importance of its human resources, and achieving a strong position in the market. Well defined organisational structures were created, built, and integrated covering:

- > Internal management
- > Marketing
- > Research and Development
- > Production and Project Management
- > Financial and Administration

TURNKEY SOLUTIONS AND INTEGRATION

The production process is the most important phase of the business. To assist its customers in this important area, Treesse Progetti collaborates closely with its partner companies, in order that it is able to successfully manage the entire process of supplying the equipment, from the logistics to the technology.

Treesse Progetti also provides extra support for production services. By supplying and integrating these service elements, a high level of business efficiency can be achieved by monitoring energy usage and managing maintenance in individual departments.

DESIGN AND PROJECT MANAGEMENT

Treesse Progetti's services range from feasibility studies through to a 24/7 support and assistance service, which can include the delivery and supply of production systems and consultancy services.

Projects are coordinated by dedicated engineers who will take care of all aspects of system implementation, thus adding value by efficiently integrating all the components of the project, and cutting unnecessary expenditure.

Treesse Progetti realises that planning is the key component of any project and has consequently developed a highly skilled technical support service able to answer queries on all aspects of system implementation and operation.

CLIENT FINANCE

During the preliminary phase of the project, clients are provided with a total cost of implementation. Once this phase of the project is complete there is a choice between a fixed-price and a variable-priced implementation, which enables clients to keep control of the project, both technologically and financially.

Treesse Progetti also offers financial assistance to allow clients the ability to flexibly spread purchase costs.

BEVANDE >

BEVERAGES <<

Treesse Progetti supplies systems to the drinks industry for the production of beer, spirits, soft drinks, and mineral water. The company's unique differentiator is its ability to create the engineering production process for its clients through the application of science.

The combination between raw material and the engineering of the production process has the flavour of the secret formula and the strictness of the applied science. Systems were created to obtain highly quality product of great personality with unmistakable character.
